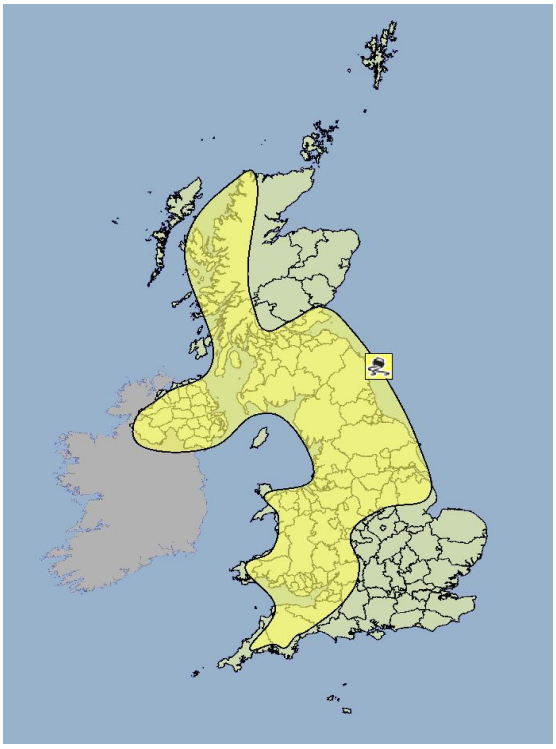
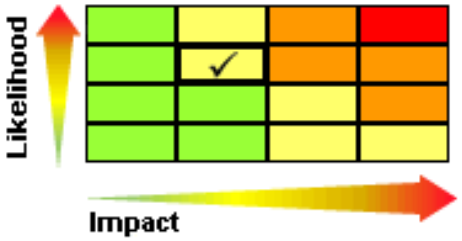
National Severe Weather Warning Service





Chief Forecasters Assessment
Showers will affect many parts of the UK during Monday, with some continuing overnight and into Tuesday morning, when temperatures will also fall below zero in some areas, bringing a risk of ice. The showers will fall as rain, sleet and hail, but as snow over hills, where several centimetres of snow may accumulate, and locally to lower levels where heavier showers occur.

The warning has been updated to extend the area further north on the eastern side of Scotland, allowing for snow in showers to fall to lower levels locally in heavier showers and to bring the start time forward by two hours.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **16:00 on Mon, 27th Feb 2017** until **10:00 on Tue, 28th Feb 2017**

Ice is expected to form during Monday evening and overnight leading to difficult driving conditions on untreated roads and slippery conditions on pavements.
